

LIVESTOCK TEMPERATURE RECORDER SYSTEM

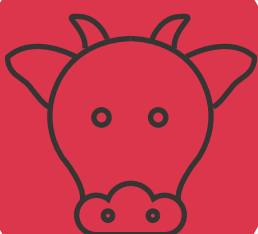

In accordance with the current legislation on animal transport, Hyphen Tech devices monitor, and record in the cabin temperatures measured within the area where the livestock are, as well as, at the vehicles' openings.

These measurements are available locally, in the event of an inspection by the authorities, or on the cloud for the fleet manager.

LIVESTOCK TEMPERATURE AND OPENING RECORDER SYSTEM

Ready-to-install tactile recording system for measuring temperatures and openings in accordance with EU livestock transport legislation.

The measurement points are time-stamped in the device's memory card and can be transferred to the cloud with a mobile application or to an SD card.
